Tweet: [China's private sector share of the top 100 firms' market capitalization declined to 42.8% at the end of 2022, down from 55.4% in 2021. @PIIE](#)

Summary: Latest data from PIIE's semiannual tracker, "China's state vs. private company tracker: Which sector dominates?"—which tracks market value of China's top 100 listed companies (ranked by market value)—show a continued decline of the share of the private sector, from 44.5 percent at mid-2022 to 42.8 percent at year-end, continuing the downward trend of the previous two half-year periods from the 55.4 percent peak observed in mid-2021. Still, the private sector share remains higher than it was throughout the 2010s, when it rose dramatically from 8 percent at end-2010 to 36 percent at end-2019.
