Tweet: According to a @markets analysis of new immigration court cases, 2% of the population of Queens, Miami and Denver are illegal migrants who arrived in 2023.

Summary: The number of migrants listing an address in Illinois for their immigration court cases jumped nine-fold in 2023 compared with just two years earlier; the increase was 7-fold in Colorado and five times in New York—bigger than the increases seen in Texas and Florida. The data also suggest that New York state saw the highest number of migrant arrivals in 2023 on a per capita basis: 1 per 100 residents of the state. New Jersey and Florida were next at 0.9. Texas and Colorado had 0.8, and Illinois ranked eighth at 0.6.
