Tweet: According to the OECD, the US lost 896 scientific authors in 2021, while China picked up 3,108. In 2015, the US gained 2,920 scientists while China lost 366. @SCMPNews

Summary: A joint study last year by Princeton, Harvard and the Massachusetts Institute of Technology found more than 1,400 US-based ethnic Chinese scientists changed their academic affiliation from American to Chinese institutions in 2021 – a 22 per cent increase on the previous year. According to data published in April by the Organisation for Economic Cooperation and Development, the US lost 896 scientific authors in 2021, while China picked up 3,108. The findings are in stark contrast to 2015, when traffic was reversed, with a gain of 2,920 scientists for the US and a loss of 336 to China.
