Tweet: The Biden administration will start deportations and has waived federal regulations in an effort to speed up border wall construction as illegal immigration into the United States surges. 200,000 people were arrested at the border in September.

Summary: The Biden administration said it would expand former President Donald Trump's wall on the Mexican border and begin deporting thousands of Venezuelans in an effort to cut down on the migrant surge that shows no signs of abating. Last month alone, 50,000 Venezuelans crossed the southern border, a record number, and they now represent the second largest nationality group, dwarfed only by Mexicans. The U.S. Border Patrol in the Rio Grande Valley, where the new stretch of the wall is to be built, had encountered more than 245,000 migrants who had entered the country between ports of entry, or unlawfully, in the 2023 fiscal year that ended Sept. 30, the notice said. It added that construction would be built with funds appropriated by Congress in 2019 for wall construction in the Rio Grande Valley.
