Tweet: Racial polarization in voting has been declining since 2012 in the US. @Nate_Cohn finds Biden underperforming relative to 2020 in current polling with non-white voters; 5% of 2020 non-white Biden voters now say they support Trump.

Summary: Mr. Biden's weakness among nonwhite voters is broad, spanning virtually every demographic category and racial group, including a 72-11 lead among Black voters and a 47-35 lead among Hispanic registrants. The sample of Asian voters is not large enough to report, though nonwhite voters who aren't Black or Hispanic — whether Asian, Native American, multiracial or something else — back Mr. Biden by just 40-39. In all three cases, Mr. Biden's tallies are well beneath his standing in the last election. The survey finds evidence that a modest but important 5% of nonwhite Biden voters now support Mr. Trump, including 8% of Hispanic voters who say they backed Mr. Biden in 2020.
