Tweet: According to recent surveys, recently laid-off tech workers are quickly finding new employment with 40% accepting a new position within 30 days. @WSJ

Summary: About 79% of workers recently hired after a tech-company layoff or termination landed their new job within three months of starting their search, according to a ZipRecruiter survey of new hires. That was just below the 83% share of all laid-off workers who were re-employed in the same time frame. Nearly four in ten previously laid-off tech workers found jobs less than a month after they began searching, ZipRecruiter found in the survey.
