Tweet: [Among China's 100 largest listed firms, private company share of total market capitalization dropped to 36.8% at the end of 2023, from a peak of 55.4% in mid-2021. @PIIE](#)

Summary: The share of China's private sector among the country's 100 largest listed companies, measured by aggregate market capitalization in the half-yearly PIIE tracker, continued to decline through 2023. It dropped from 38.1% in mid-2023 to 36.8% at the end of 2023, extending a nonstop slide since its mid-2021 peak of 55.4%. The private sector is defined restrictively as firms with less than 10 percent state ownership. Meanwhile, the share of the state sector, including both mixed-ownership enterprises (MOEs), in which the state owns between 10 and 50% and majority-owned state-owned enterprises (SOEs), continued to advance in 2023, rising from less than 60% a year ago to more than 63% at the end of 2023.
