Tweet: 32mm foreign-born workers made up 18% of the American labor force last year, the highest level since the series was initially published in 1996.

Summary: This year, average monthly growth in the foreign-born labor force is about 65,000 higher compared with 2022 on a seasonally adjusted basis, a Goldman Sachs analysis found. After plunging at the start of the pandemic, the size of the foreign-born labor force has rebounded, nearing 32 million people in August. Foreign-born workers' share of the labor force—those working or looking for work—reached 18% in 2022, the highest level on record going back to 1996, according to the Labor Department. It has climbed further this year to an average of 18.5% through August, not adjusted for seasonal variation.
