**Tweet:** According to the new CPI report, Core-CPI rose by 0.2% in November to 6% year-over-year, coming in under the 0.3% median estimate of a @Bloomberg survey of economists.

**Summary:** Excluding food and energy, the consumer price index rose 0.2% in November and was up 6% from a year earlier, according to a Labor Department report Tuesday. Economists see the gauge — known as the core CPI — as a better indicator of underlying inflation than the headline measure. The overall CPI increased 0.1% from the prior month and was up 7.1% from a year earlier, as lower energy prices helped offset rising food costs. The median estimates in a Bloomberg survey of economists called for 0.3% monthly increases in both the core and overall measures.
