Publication Date	November 17, 2023

Tweet: Citing that 40% of Russell 2000 firms have negative earnings, Torsten Sløk @apolloglobal argues that “if the economy enters a recession, a lot of middle-market companies will be vulnerable to the combination of high rates and slowing growth.”

Summary: During recessions, the share of unprofitable firms rises. This is not surprising. But even before the economy has entered a recession, the share of companies in the Russell 2000 with no earnings is at 40%. The bottom line is that if the economy enters a recession, a lot of middle-market companies will be vulnerable to the combination of high rates and slowing growth.
