Tweet: According to data from Quest Diagnostics, 4.3% of workforce drug tests came back positive for marijuana in 2022, up from 3.9% in 2021. In the accommodation and food services sector, 8.1% of tests in the were positive, up from 4% in 2018.

Summary: Of the more than six million general workforce tests that Quest screened for marijuana in 2022, 4.3% came back positive, up from 3.9% the prior year. That is the largest marijuana positivity rate since 1997. Positivity rates last year for certain classes of opioids and barbiturates declined. More than two-thirds of U.S. states have legalized recreational or medicinal use of marijuana. The percentage of employees that tested positive for marijuana following an on-the-job accident rose to 7.3% in 2022, an increase of 9% compared with the prior year. From 2012 to 2022, post-accident marijuana positive test rates tripled, tracking with widening legalization.
