Tweet: With the reemergence of the "de-dollarization" debate, @jnordvig looks at the market and concludes, "The dollar is not weak. The dollar is strong. Perhaps not in the narrative told. But in the actual market it is."

Summary: There is no long-term trend of USD decline. It always depends on which dollar index you look at. But regardless of the index, you will find that the USD is above its long-term average, in nominal and real terms currency, despite all the Dollar Hatred.
