Tweet: Exports from China's western provinces are up 94% since 2018, reaching \$630B in the year ending August, vs. India's \$425B, Mexico's \$590B, and Vietnam's \$346B.

Summary: Since the start of 2018, exports from 15 of China's central and western provinces have rocketed 94%. In the 12 months through August, those provinces exported a combined \$630 billion—more than India's \$425 billion, Mexico's \$590 billion, and Vietnam's \$346 billion over the same period, according to official figures compiled by data provider CEIC. Since the beginning of 2018, exports from India have risen 41%, exports from Mexico have risen 43%, and exports from Vietnam have increased 56%.
