Summary: Sun Xin, now an assistant professor in mathematics at the University of Pennsylvania, will take up a new appointment at the Beijing International Centre for Mathematical Research at his alma mater, Peking University, although the university did not specify Sun's new role. At least 1,400 US-based ethnic Chinese scientists switched their affiliation in 2021 from American to Chinese institutions, according to a joint report by academics from Harvard and Princeton universities and MIT. Life scientist Yan Ning, for example, made headlines in China when she gave up a permanent post at Princeton. After five years in the US, the structural biologist returned to China last year to establish and serve as dean of the Shenzhen Medical Academy of Research and Translation.
