Tweet: [Canada's population is now 40mm people, nearly 25% of them born abroad as Canada's population growth rate hits 2.7% the highest among advanced economies. @markets](#)

Summary: Nearly one in four people in Canada are now immigrants, the largest proportion among the Group of Seven nations. At the current pace of growth, the smallest G-7 country by population would double its residents in about 26 years, and surpass Italy, France, the UK and Germany by 2050.
