Tweet: Real wages fell over the past year, declining 1.7% year-over-year in December. In 2021, real wages had declined 2.1% through December. @WSJ

Summary: Worker pay actually fell in the past two years after accounting for inflation. Inflation-adjusted average hourly earnings—or real earnings—were down 1.7% in December 2022 from a year earlier, following a 2.1% decline in December 2021 [from a year earlier].
