Tweet: Almost 50,000 people killed themselves in the United States in 2022. At 14.3 deaths per 100,000, that's the highest rate since 1941. Suicide rates for young people declined to their pre-pandemic level.

Summary: Nearly 50,000 people in the U.S. lost their lives to suicide in 2022, according to a provisional tally from the National Center for Health Statistics. The agency said the final count would likely be higher. The suicide rate of 14.3 deaths per 100,000 people reached its highest level since 1941. Suicide rates for children 10-14 and people 15-24 declined by 18% and 9%, respectively, last year from 2021, bringing suicide rates in those groups back to prepandemic levels.
